

Will Enright

Experience

Attune

July 2025 - Present

Senior Software Engineer

- Developed a call campaign scheduling system for a healthcare agentic voice platform, including a no-code flow builder, using React and Spring Boot

Egen

November 2024 - June 2025

Senior Software Engineer

Client: Tempus AI

- Delivered features for a React-based laboratory management system that handles tissue sample storage and workflow
- Built a queue service in Node that ensures robust processing of genetic sequencing experiments

Yext

July 2021 - June 2024

Software Engineering Manager

- Led a team of 8 software engineers using Agile methodologies
- Oversaw a portfolio of 180+ clients, including FedEx, Verizon, and Subway, with a total annual contract value of over \$42 million
- Collaborated with project managers and designers to architect solutions that match the clients' visions
- Conducted interviews and mentored junior developers to help grow their programming skills

Yext

November 2018 - July 2021

Software Engineer

- Developed locator and landing pages for hundreds of thousands of retail locations using React
- Implemented data pipelines for ingesting millions of entities daily using Go
- Built a dashboard using Java to allow Allstate agents to customize their Yext pages

Capital One

September 2017 - October 2018

Associate Software Engineer

- Maintained a critical, highly available orchestration API which served millions of users daily
- Created a full stack support tool to debug and trace API requests using Django, Angular, and Kafka
- Designed health check, alerting, and failover strategies for AWS services to minimize downtime
